

POINTERS QUESTIONS

- 1.) Implement a function to find the intersection of two arrays using pointers
- 2.) Write a program to check if a string is an anagram of another using pointers.
- 3.) Implement a function to find the kth smallest element in an array using pointers.
- 4.) Write a function to reverse the words in a sentence using pointers.
- 5.) Implement a function to perform matrix multiplication using pointers.
- 6.) Write a program to remove all occurrences of a specified element from an array using pointers.
- 7.) Implement a function to find the smallest and largest elements in an array using pointers.
- 8.) Write a program to check if a number is prime using pointers.
- 9.) Implement a function to find the power of a number using pointers.
- 10.) Write a program to find the GCD (Greatest Common Divisor) of two numbers using pointers.
